Lifting & Elevating Equipment
**Scissor Lift Trolleys**

These units help take the strain out of loading and unloading items from raised levels. The table is elevated by a pump action foot pedal and smoothly lowered by a hand operated release trigger. The double scissor model, gives the added advantage of elevating loads of up to a height of 1575mm.

- Foot operated hydraulic operation
- Lever release control
- Safety overload bypass valve
- Positive braking system on rear wheels
- Durable powder-coated finish
- Stepless rate of lowering regardless of load weight
- The 150kg version code LT8701 has a foldable handle as pictured

**Rough Terrain Scissor Lift Trolley**

- Capacity: 200kg
- Max. Lift Height: 1000mm
- Min. Height of Table: 330mm
- Table Size: 1000x500mm
- Total Height: 1056mm
- Overall Length: 1120mm
- Foot Pedal Cycles to Max Height: 25
- Wheel Diameter: 200mm
- Unit Weight: 71kg
Aluminium Scissor Lift Trolley

- Extremely lightweight - Great for vehicle transport
- Aluminium trolley has a painted finish
- Foot operated hydraulic operation
- Lever release control
- Safety overload bypass valve
- 100mm castors with brakes on rear wheels
- Stepless rate of lowering regardless of load weight
- Foldable handle
- Handle Height: 1000mm
- 100kg load capacity
- Table Size: 450x700mm (WxL)
- Minimum Height: 265mm
- Maximum Height: 755mm
- Unit Weight: 24kg

Stainless Steel Scissor Lift Trolleys

These stainless steel scissor lift trolleys are great for use in food, pharmaceutical or hygiene areas.

- Foot operated hydraulic operation
- Lever release control
- Safety overload bypass valve
- 100mm castors with brakes on rear wheels
- Stepless rate of lowering regardless of load weight
- Scissor and pump unit is galvanised
- Stainless Steel Grade 304
- Handle Height: 1000mm

Galvanised Scissor Lift Trolley

Galvanised version which is great for food and medical areas

- Foot operated hydraulic operation
- Lever release control
- Double scissor lift version
- Safety overload bypass valve
- 100mm castors with brakes on rear wheels
- Stepless rate of lowering regardless of load weight
- 150kg load capacity
- Table Size: 500x830mm (WxL)
- Minimum Height: 435mm
- Maximum Height: 1430mm
- Unit Weight: 80kg

Extra Large Scissor Lift Trolleys

The extra large scissor lift trolleys are excellent for handling large bulky items. The table is elevated by a pump action foot pedal and smoothly lowered by a hand operated release trigger.

- Foot operated hydraulic operation
- Lever release control
- Safety overload bypass valve
- Positive braking system on rear wheels
- Durable powder-coated finish
- Stepless rate of lowering regardless of load weight
- Available in 500kg and 1000kg load capacities

Spring Scissor Lift Trolleys

- Self-leveling, fully adjustable, weight sensitive
- Designed to maintain an ideal working height for assembly lines and loading / unloading operations
- Balance achieved by double springs fitted to the shock absorbers
- Simple to operate spring tension adjustment

- Max. Lift Height: 1300mm
- Min. Height of Table: 540mm
- Table Size: 1300x820mm
- Turning Radius: 1500mm
- Drive Wheel Diameter: 250mm
- Electro magnetic brakes
- Battery: 24v, 120Ah
- Unit Weight: 446kg

Electric Scissor Lift Trolleys

The battery electric scissor lift trolleys are available in both standard lift and high lift versions and 3 load capacities, 300kg, 500kg and 1000kg.

- Smooth lifting of heavy loads with ease
- Double rear brake castors
- Automatic 12v charger
- Push button, battery/hydraulic operation

Self Propelled Electric Scissor Lift Trolley (with cage)

- These self propelled lift tables take the effort of having to push heavy items manually as well as having electric operated lift.
- With the centre drive wheel it makes it extremely easy to manoeuvre loads in narrow aisles or tight spaces.
- Comes complete with side cage as pictured which can be easily removed if not required.
- Overall Size: 1240x600x1100mm (LxWxH)
- Table Deck Size: 600x1000mm (WxL)
- Min Table Height: 460mm
- Max Table Height: 900mm
- Unit Weight: 180kg
- Max Capacity: 400kg
- Batteries: 2x12V 33Ah
- Controller: 70A
- Motor (Driving): 400W
- Motor (Lifting): 400W

Pallet Rotator Ring - Code: P1066
The rotator ring is popular due to its light weight and easy maneuverability. It can be moved easily by one person.
Capacity: 2000kg
Diameter: 1000mm
Turntable Height: 65mm
Unit Weight: 36kg

Pallet Turntable Disc - Code: P1065
Pallet Turntable Disc is a highly engineered, low profile pallet rotating platform designed to safely rotate pallets during loading and unloading. Pallet rotation reduces strain caused by reaching over the pallet whilst carrying heavy loads. Nearside loading and unloading increases productivity as there is no need to walk around pallets.
Capacity: 2000kg
Diameter: 1070mm
Turntable Height: 23mm
Unit Weight: 90kg

Spring Loaded Tilting Stand

- These clever yet simple spring loaded tilting stands are designed to make it easy to decant from IBC bulk storage containers.
- The hinged platform slowly raises to a 10 degree angle as the weight decreases.
- Sits on a base with bolt on fork pockets which can be removed if required
- Capacity: 2000kg
- Easy to move with a forklift
- Simple and easy-to-use
- Platform Size: 1200x1130mm
- Unit Weight: 63kg
- Finish: Zinc Plated

Super Low Profile Lift Tables

- These lift tables achieve a super low closed height, eliminating the need for a pit installation
- The upper platform is fitted with a safety perimeter to prevent descent on contact with obstructions
- 24v control unit with up/down buttons and emergency stop
- Power supply is AC 415V/50HZ/3phase
- The external power pack is equipped with a relief valve against overloading and a compensated flow valve for controlling lowering speed
- Hose burst safety valve which stops the table lifting in case of a hose breakage

The closed height is only 10mm

Armlift Lift Tables

Armlift’s unique patented function offers an ergonomic workplace with ample foot space, comfortable working positions and unrivalled accessibility. Armlift is the perfect choice for almost all workplaces that handle goods and components on pallets, in baskets or containers.

Loads are lifted with parallel arms that can also tilt the load in a single mechanism making Armlift an economical alternative to conventional tables which require separate lift and tilt mechanisms. Because the Armlift tilts down it is especially suited for use with high pallets, oversized baskets and containers.

Contact us here or visit www.mhaproducts.com.au/Armlift-Lift-Tilt-Tables for more information and operational video

1800 750 900
Low Profile Pallet Lift Tables

Many applications require the regular loading and unloading of palletised goods. Repetitive lifting and stretching can be time consuming and hazardous. Using pallet lift tables elevates pallets to the optimum lift height reducing the risk of repetitive strain injury and increasing productivity.

- Low clearance – only 85 mm
- Supplied with entry ramp to allow pallet truck entry
- Can be supplied with optional rotator ring
- Tables are specially made for handling pallets, no need for a pit or load ramps
- Upper platform fitted with safety perimeter to prevent descent on contact with obstructions
- 24v control box with UP and DOWN buttons and emergency stop
- External power pack equipped with a relief valve against overloading and a compensating flow valve for controlling lowering speed
- Power Supply: 240v (3 phase 415v available if required)
- Hose burst safety valve to stop the lift table lowering in case of hose breakage
- Removable lifting eyes to facilitate handling and installation of the lift table
- Oil-less bushings on pivot points

Electric Scissor Lift Tables

Lift tables can be applied in many work places to increase productivity and safety. Loads can be elevated or lowered to optimum heights at the push of a button.

**Standard Features**

- Heavy duty design and construction
- High quality European power packs
- Suitable for on floor applications or in floor pit applications
- Self lubricating bushings on pivot points
- Removable lifting eyes to facilitate installation and maintenance
- 240V power supply (3 phase available as an option)
- Upper platform fitted with aluminium safety bar preventing descent on contact with obstructions
- Low volt (24v) control box with up-down buttons.
- Internal power pack equipped with relief valve against overloading and compensated flow valve for controlled lowering speed
- Heavy duty cylinders with drainage system and check valve to stop the lift table lowering in case of hose burst
- Safety clearance between scissors to prevent trapping during operation.
- Push button pendant control with up, down and emergency stop

Bishamon Pneumatic Rotating Pallet Positioner

The most advanced pallet positioner available!

- EZ Loaders are designed to eliminate worker bending by automatically raising and lowering pallets during loading or unloading without the use of mechanical springs, motors or hydraulics.
- The new EZ loader can now handle a wide range of weight capacities from 110 kilos to 1800 kilos.
- The EZ Adjust knob - a three position knob that allows adjustment of the collapsed capacity without changing the air pressure.
- EZ Loaders also allow easy pallet rotation for near-side loading so the worker does not have to reach or strain.
- As the load weight changes, the EZ Loader automatically adjusts, keeping the top of the load at a convenient working height.
- The patented pneumatic system found only on the EZ Loader has proven to be the choice of industry professionals worldwide.

Optional Accessories for Scissor Lift Tables

**Conveyor Bed**
Great for use in applications where the goods can be raised then moved onto a bench or production line with ease.

**Protection Curtain**
These curtains protect the tables working mechanisms from dust, dirt and debris. The bellows are suitable for indoor and outdoor applications. These curtains can also be made with a chain mesh to give extra protection from objects falling into the working area of the lifter.

**Side Barrier Rails**
We can create a railing which can be used as a goods lift for persons or to bridge the gap between levels. We can create a full railing barrier with a swing open door if required. The up/down controls can be mounted at operator waist height so that they can control from lifter platform level.

**Raise and Tilt Platform**
The lift table can be fitted with a hydraulic tilt platform with a tilt angle up to 90 degrees. Great for tipping objects into a pit or bin.

**Round Turntable**
We can mount a turntable to the top of the lift table which is great for putting pallets or objects on with ease of turning for the operator.

**Forkable Frame**
By mounting the lift table on a frame or blocks as shown in red, you can then move the table easily using either a forklift or pallet truck.

**Trolley - Wheels Mounted**
We can fit heavy duty lockable castor wheels to the base frame which would convert your lift table into a mobile unit.

**Hinged Loading Flap**
This can be mounted to the lift table to bridge the gap between loading docks, work areas or vehicles.

**Side Barrier Rails**
We can create a railing which can be used as a goods lift for persons or to bridge the gap between levels. We can create a full railing barrier with a swing open door if required. The up/down controls can be mounted at operator waist height so that they can control from lifter platform level.
Spring Loaded Rotating Pallet Tables

- The pallet elevator keeps the active layer of the load at or above waist height, eliminating bending and lifting.
- It proves highly effective at reducing the incidences of repetitive strain and back injury.
- The construction of the pallet elevator is a scissor type action with varying springs which can be adjusted for different load capacities up to 2000 kg.
- Turntable allows the operator to rotate the load with minimal stretching and reaching.
- No ground fixing required
- Load Capacity: 2000kg
- Table Diameter: 1110mm
- Low Height: 230mm
- Max Height: 705mm

Rotatable Electric Lift Table

- The pallet elevator is electric up and down via foot pedal and manual rotating top
- It is ideal for varying weight pallets as no need to change springs
- Turntable allows the operator to rotate the load with minimal stretching and reaching while controlling the up/down operation via the foot pedal controls
- No ground fixing required
- Can be easily moved with a pallet truck or forklift
- Load Capacity: 2000kg
- Table Diameter: 1110mm
- Low Height: 300mm
- Max Height: 710mm
- Base Size: 920x930mm
- Power: 240V

LT7050 | Rotatable Electric Lift Table
Battery Electric Work Positioner

- A range of highly manoeuvrable, lightweight lifts, designed to take the strain out of any lifting job from ground level to over shoulder height
- Ideal for use in narrow aisles and confined spaces. Perfect for all applications from pharmaceutical to catering, from packing line to food processing
- Automatic electric overload protection system ensures safe operation
- Quick change attachment options available
- EN1757 compliant. CE marked
- Battery electric with built in charger that you can plug in anywhere
- Load Centre: 235mm
- Overall Size: 600mm wide, 890mm long, 1990mm high (WP7269)
- Overall Size: 600mm wide, 890mm long, 1790mm high (WP7270)
- 24v, 7.2Ah battery

Aluminium Lift Assist Devices

- These aluminium lifters are great for assisting in the lifting, positioning and installation of goods at height
- Ideal for lifting items into ceiling spaces or handling machine parts at height
- All units fold for easy storage and transport
- Manual hand winch control with automatic braking action
- Fits through standard doorways
- Quick set up - requires no tools
- Legs fold up for easy storage
- Stowed Height: 2000mm
- Width: 750mm (AT503 & AT504 have a straddle attachment which makes it 1880mm wide in operation)
- Ground Clearance: 50mm
- Minimum Height: 150mm
- Arm Length: 800mm

Electric Counter Balance Fork/Platform Stacker

- Ideal for situations where normal stacker legs would get in the way
- Electric lift up and down
- Lift Capacity: 250kg
- Adjustable Forks: 215-550mm
- Fork Size: 600x100mm (LxW)
- Max Lift Height: 1500mm
- Min Height: 60mm
- Overall Size: 1500x720x1740mm (LxWxH)
- Wheel Sizes: 125x50mm
- Battery: 12v, 60Ah
- Unit Weight: 225kg
- Optional platform supplied with lifter
120KG Fork/Platform Trolley

- Robust, light weight steel construction platform lift trolley which is ideal for lifting heavy items to a work bench level for working on
- The platform is removable and has 2 fork tines under platform for lifting small skids
- Lift Height: 1050mm
- Min Fork Height: 95mm
- Capacity: 120kg
- Platform Size: 420x500mm (LxW)
- Overall Width: 460mm
- Overall Height: 1370mm
- Overall Length: 700mm
- Fork Size: 420x50mm (LxW)
- Net Weight: 39kgs

Platform and Fork Lift Trolley

- The ideal trolley for lifting loads up to 150kg with ease
- Complies to AS1418.2
- Swappable accessories for handling of different loads
- Forks for lifting small pallets and skids
- Platform for general lifting
- Patented silent winch which locks the load at any height
- Steel cable which runs inside the mast to prevent pinching
- Large 250mm puncture proof wheels
- Made from aluminium
- Lift Height: 1050mm
- Load Capacity: 120kg with platform and 150kg with forks
- Operating Dimensions: 710x500x1320mm (WxDxH)
- Folded Dimensions: 300x500x1320mm (DxWxL)
- Platform Dimensions: 360x420mm (DxW)
- Fork Dimensions: 50x460mm (WxL)
- Unit Weight: 20kg

Custom Made Lifting Equipment

We can custom design and make trolleys and lifting equipment specific to your particular requirements to eliminate back strains and injuries in the workplace.

**Attachment Options**
- Fixed or removable platform
- Fixed or adjustable forks
- Lifting jibs
- Roll prongs and rotators
- Drum lifters and rotators
- External grab rotators
- Tote and bin lifters

**Chassis Options**
- Manual winch lift
- Silent winch
- Battery electric lift
- 2 stage lift
- Low clearance base
- Counter balance (no front legs)
- Traction drive

Quikstak™ S10 Series
Semi-electric pallet stackers with 1-tonne capacity

The Quikstak S10 Series is a range of semi-electric pallet stackers, the successor to our popular A1010 range. The S10 combines effortless maneuverability with a one-tonne capacity and 1600mm lift height; optionally increased to 2500mm or 3000mm. Like all Quikstaks the S10 can be supplied with Quikstak’s proprietary ‘magic-eye’ sensor system, which automatically adjusts the forks to maintain an ergonomic work height as product is stacked or destacked.

The S10 is now supplied as standard with a single ‘easy-roll’ nylon steered wheel, which provides excellent directional control and creates a triangle of surface-contact points – ideal for use on uneven surfaces or outdoors. Both the forks and straddle legs are width-adjustable, allowing the S10 to handle very large pallets and crates.

Under the covers, the S10 is fitted with a 24v/120Ah sealed gel battery, electronic controller and ultra-reliable hydraulic mechanism. The raise/lower controls, E-stop, battery indicator, key switch and hour-meter are located in a small fascia panel.

The Quikstak S10 complies with a range of international quality and safety standards, and is manufactured in an ISO 9000 certified plant. It is the only semi-electric pallet stacker available which has been specifically optimised for Australasian conditions.

---

Quikstak™ SP10 Series
Self-drive pallet stackers with 1-tonne capacity

The Quikstak SP10 Series is a range of self-drive pallet stackers with a one-tonne capacity and 1600mm lift height (optionally increased to 2500mm or 3000mm). Like all Quikstaks, the SP10 can be fitted with Quikstak’s proprietary ‘magic-eye’ sensor system, which automatically adjusts the forks to maintain an ergonomic work height as material is stacked or destacked. This technology has been developed by Quikstak since 1994 and offers considerable health and safety benefits for operators.

Despite its compact size, the SP10 features a suite of new S-Series technology, including adjustable forks and straddle legs, a brushless motor, and an ergonomic new tiler with handle-mounted controls. However, what really sets the SP10 apart is a tiny 1490mm turning radius and minimum width of 1132mm - there is almost nowhere this stacker can’t go!

The Quikstak SP10 complies with a range of international quality and safety standards, and is manufactured in compliance with ISO 9000. It is the smallest self-drive pallet stacker available which has been specifically optimised for Australasian conditions – combining innovative design with Quikstaks trusted heritage of reliability.
Quikstak™ SP15 Series
Heavy-duty self-drive pallet stackers with 1.5-tonne capacity

The Quikstak SP15 Series is a range of heavy-duty self-drive pallet stackers, with a capacity of 1500kg and lift heights from 1.6 metres to as high as 5.6 metres. Optionally equipped with ‘magic-eye’ automatic height adjustment, the SP15 is suitable for warehousing, despatch, manufacturing, stacking and general materials handling operations, in any industry.

The SP15 is powered by a new self-drive unit, with a brushless electric motor and intelligent regenerative braking system. Combined with a bank of lead-acid batteries delivering 200Ah, this permits all-day use in even the most demanding of environments.

Both the straddle legs and forged forks on the SP15 are width-adjustable, allowing the stacker to lift all common types of pallet, as well as traverse warehouse aisles as narrow as 1200mm. The tiller includes infinitely-variable drive controls, ergonomic raise/lower buttons and a safety sounder, all accessible with both hands.

Like all Quikstak S-Series products, the SP15 complies with a range of international quality and safety standards, and is manufactured in an ISO 9000 certified plant. It is the only heavy-duty, high-reach pallet stacker available which has been specifically optimised for Australasian conditions.

The standard model lift height is 1.6 metres however other custom lift heights are available up to 3 metres with the S10 and SP10 models and up to 5.6 metres with the SP15 model. Please contact us for a quotation on your particular requirements.

The way the Quikstak magic-eye works

Unloading timber onto conveyor using auto infra-red eye sensor
As load decreases the height automatically raises to the conveyor height

These are our standard model basic specifications listed below. Please refer to our website for full detailed specifications on each model and video of these in operation.
Semi Auto Electric Fork Stacker

These semi auto fork stackers are the ideal machine for any warehouse. They are manual push and electric up/down with handle-chain assisted steering which greatly reduces operator labour intensity.

They have adjustable fork tines & straddle legs which allows the operator to pickup Australian sized pallets as well as other smaller or odd shaped pallets or skids.

- Load Capacity: 1000kg
- Lift Height: 3000mm
- Overall Height (with mast lowered): 2145mm
- Overall Height (with mast extended): 3600mm
- Overall Length: 1835mm
- Overall Width: 1532mm (maximum)
- Tine Dimensions: 60x142x1070mm
- Ground Clearance: 40mm
- Wheel Type: Nylon
- Turning Radius: 1505mm
- Brake: Mechanical foot pedal
- Battery: 12v, 120Ah
- Unit Weight: 550kg

Fully Auto Electric Fork Stacker

These fully auto fork stackers are have the latest technology and safety functions. They are fully automatic both electric drive and electric up/down.

The motor structure is both dust and water proof which makes it functional to load or unload trucks in wet conditions.

They have an adjustable fork tines & straddle legs which allows the operator to pickup Australian sized pallets as well as other smaller or odd shaped pallets or skids.

- Load Capacity: 1500kg
- Lift Height: 3300mm
- Overall Height (with mast lowered): 2295mm
- Overall Height (with mast extended): 3995mm
- Overall Length: 2095mm
- Overall Width: 1595mm (maximum)

Stand-On Electric Pallet Truck

- Avoid the strain of manual pallet trucks by using this electric stand on battery electric pallet truck.
- The stand-on platform is great for use in large warehouses where pallets need to be moved long distances or this platform can be folded for walk behind use.
- Load Capacity: 2000kgs
- Min Fork Height: 82mm
- Overall Truck Length: 1710mm (excluding stand on platform)
- Overall Truck Width: 775mm
- Overall Fork Width: 685mm
- Fork Dimensions: 53x180x1100mm
- Wheel Type: Polyurethane
- Standing Platform Size: 490x462mm (Width x Depth)
- Travel Speed (unloaded): 7.1 Km/h
- Electromagnetic Brake
- Battery: 24v, 210Ah
- Brushless AC motor
- Emergency stop button
- Total Unit Weight: 710kg

**Extra Long 2000KG Pallet Trucks**
- These extra long pallet trucks are extremely useful for extra deep pallets
- Available in 1800 and 2500mm long as standard however other sizes are available on request
- Also can be used to pickup two pallets in one lift.
- Tine Size: 60x160mm
- Steering Wheel Size: 50x200mm
- Powdercoated safety yellow
- Polyurethane wheels

2000KG Pallet Truck With Load Scales

Our scale pallet trucks are extremely reliable and highly accurate in measuring your pallet weight. This fork truck has a totalising function which adds up multiple pallet weights giving the total weight per shipment or order.

- The weighing unit uses four AA batteries which give approx 4200 weighting actions
- The unit gives a low battery warning and shuts off after 3 minutes
- The digital display can be read from any angle in ambient light conditions
- Optional scale printer unit available on request
- Capacity: 2000kg
- Scale Increments: 1kg
- Scale Functions: Zero correction, gross/net weight, total weight
- Overall Fork Width: 690mm
- Minimum Fork Height: 76mm
- Overall Fork Length: 1150mm
- Overall Truck Length: 1650mm
- Tine Size: 50x182mm
- Steering Wheel Size: 50x180mm

1000KG Hi-Lift Pallet Trucks

- Great for lifting skids and pallets with no bottom rail
- Extremely easy to pump and light weight
- Quick-lift as standard with automatic transfer to normal lifting loads over 150kg
- Automatic descending speed control, regardless of load
- Front support legs and adjustable stabilisers ensure maximum stability
- Heavy duty design
- Conforms to EN 1757-4
- Not suitable for closed pallets with a bottom rail
- Stainless Steel version - all parts are made from stainless steel including the hydraulic pump, fork frame, handle, push rod, bearings, pins and bolts etc
- For use in the food and pharmaceutical industries or other industries where corrosive acids are used

Slip-On Roll Forklift Prong

Slip-on Roll Prong suitable for fabric, cable and coil products. Can also be used for carpet handling, but usage is generally restricted to larger forklifts due to the extended load centre created by the length of the tines. These attachments quickly adapt to almost any forklift and require only the connection of a safety chain to prevent unintentional disengagement.

- Prongs are manufactured from high tensile steel and can be made to any length
- Fork Pocket Size: 190x65mm
- Fork Centres: 345mm
- Enamel paint finish
- Safe Working Load: 850kg
- The safe working load (SWL) is measured per pair at 600mm load centre
- Prong Length: 2800mm (from end of jib)
- Prong Diameter: 70mm
- Unit Weight: 194kg

2200KG Standard Pallet Hook

The PH2906 Pallet Hook features variable body height and adjustable tine width, making this versatile attachment ideal for the transport and construction industry.

Load balancing is via the moveable lifting ring.

The Pallet Hook has been designed & certified in accordance with Australian Standard AS 1418.1

- Safe Working Load (SWL): 2200kg
- Load Centre: 600mm
- Unit Weight: 215kg
- Tine Size: 100x45x1055mm
- Adjustable Clearance: 1005mm - 1605mm (distance between tines and head)
- Shipping Size: 1200x1200x400mm
- Finish: Zinc plated

4500KG Heavy Duty Pallet Hook

A heavy duty 4.5 tonne capacity pallet hook for loads up to 4500kg. Fully adjustable tines makes this unit extremely versatile. Load balancing is carried out by positioning the lifting ring to suit the Centre of Gravity of the load. Load balancing is via the moveable lifting ring.

The Pallet Hook has been designed & certified in accordance with Australian Standard AS 1418.1

- Safe Working Load (SWL): 4500kg
- Load Centre: 600mm
- Unit Weight: 456kg
- Tine Size: 125x50x1070mm
- Clearance: 1405mm (distance between tines and head)
- Shipping Size: 1200x1250x1800mm
- Finish: Enamel painted

2000KG Automatic Pallet Hook

The automatic pallet hook, type PH2908, is self-levelling for ease of operation. An internal spring mechanism ensures the lifting eye is in the correct position to keep the tines horizontal, eliminating the need to reposition the lifting ring. Enclosed frame members protect the operator from moving parts.

The Pallet Hook has been designed & certified in accordance with Australian Standard AS 1418.1

- Safe Working Load (SWL): 2000kg
- Load Centre: 600mm
- Unit Weight: 196kg
- Adjustable Tine Size: 100x45x1055mm
- Clearance: 1355mm (minimum distance between tines and head)
- Shipping Size: 1200x1250x1800mm
- Finish: Zinc plated

Crane lifting lug

Lifting & Elevating Equipment

Code Description
BJ2000 Bag Hook Jib - 2.0 Tonne

Catalogue Page 102
Support Structures for Lifting Systems

A range of structural support systems are available for use with hoists and vacuum lifting systems

- All systems are designed and manufactured to conform to AS1418 Crane Code.
- Capacities range from 100-2000kg (or as required).
- Each application is customized to suit existing site conditions and particular workplace requirements.

Jib Arm

- The jib arm consists of an easy move track and carriage which allows unimpeded access within the swing area.
- The jib arm can be column mounted, ceiling mounted or wall mounted.
- Column mounted jibs can be bolted to the floor or used with a forkliftable base.

Overhead Travelling Crane

Overhead travelling crane systems are available for use where greater flexibility is required. Travel rails are connected to columns mounted on the floor or connected to roof purlins subject to weight loading.
Freestanding Jib Crane (Straight Arm)

These free standing jib cranes are ideal for use in workshops using vacuum lifters, chain hoists, lever blocks and air hoists.

Designed for machinery and maintenance industries for safe and easy moving of heavy or awkward items.

Can be bolted down for indoor or outdoor use.

- Requires girder trolley for use
- Capacity: 500kg
- Overall Height: 4900mm
- Height from ground to under arm: 4490mm
- Overall Length of Arm from post: 3870mm
- Rotating Angle: 360 degrees
- Base Plate Size: 500x500mm

Please Note: The girder trolley and lifting hoists are sold separately to the crane unit

Freestanding Jib Crane (Articulated Arm)

These free standing jib cranes are ideal for use in workshops using vacuum lifters, chain hoists, lever blocks and air hoists.

Designed for machinery and maintenance industries for safe and easy moving of heavy or awkward items.

Can be bolted down for indoor or outdoor use.

- Capacity: 500kg
- Overall Height: 4700mm
- Height from ground to under arm: 4300mm
- Overall Length of Arm from post: 4070mm
- Turning Radius: 4.0 metres
- Rotating Angle: 360 degrees
- 2 hook anchor points
- Base Plate Size: 600x600mm

Please Note: The lifting hoists are sold separately to the crane unit

1 Tonne Gantry Crane

Designed for transporting and positioning materials both indoors and outdoors.

These mobile gantry cranes are ideal for use in workshops using vacuum lifters, chain hoists, lever blocks and air hoists.

- Solid steel construction
- Electric hoist pictured is sold separately to gantry crane
- Quick and easy setup
- Large lockable castors
- Height adjustable 3 metres - 4 metres
- Load Capacity: 1000kg
- Span: 3 metres

Girder Push Trolley

- Manufactured to comply with AS1418.2.
- Fully adjustable to suit various beam widths.
- Fitted with anti-drop plates for improved safety and compliance.
- High-grade, fully sealed bearings for maintenance free extended life
- Single pin configuration
- Load Capacity: 500kg
- Unit Weight: 6.5kg

Foldable Portable Crane 1.5 Tonne

This foldable crane has multiple uses for lifting heavy items up to 1500 kilos from cars, machinery, pits etc.

- Folds compact for storage.
- Smooth operation using hand bar to pump crane up.
- Full swivel hook with safety clip fitted as standard.
- Controlled lowering with positive stop.
- Jacks from folded to upright position.
- Net Weight: 92kgs
- Max Height: 1990mm

Electric Chain Hoists - Portable

These portable hoists are compact, lightweight 240 volt single phase electric chain hoists. They conveniently come in a durable travel case which makes them the ideal portable solution for lifting, lowering and handling loads up to 500kg. All models are tested to the Australian standards.

Features
- Manufactured to comply with AS1418.2
- All models suitable for 240 volt, 50 Hz single phase power supply
- Available in 80kg, 125kg, 250kg and 500kg capacities
- Duty cycle rated at 30% ED with 180 starts per hour
- 18 volt DC low voltage control for safe operation
- IP65 pendant control, dual speeds with variable speed slow control for raise and lower
- Overload protection clutch prevents damage caused by overloading
- All models are supplied as standard with 6 metre height of lift, a 5 metre pendant control, chain bucket and 3 metre power supply cable
- Upper and lower electrical limit switches
- Supplied with durable travel case

Electric Chain Hoists 415Volt, 50Hz

Electric Chain Hoists offer a great balance between quality and price. The models vary from 250kg to 2 tonne capacity and are all tested to the Australian standards. All hoists are inclusive of many features which makes them suited for most applications. Optional Motorised Trolleys are available to complete the package.

Features
- Manufactured to comply with AS1418.2
- IP65 pendant with 24 volt control for operator safety
- Overload protection clutch prevents damage caused by overloading
- Inclusive of DC Brake which automatically engages in the event of a power failure
- Completely enclosed design to withstand harsh conditions
- Upper and lower electrical limit switches
- Grade 80 zinc plated load chain supplied as standard
- Motor thermal protection on all Pacific Electric Chain Hoists
- Fuse protection provided for both primary and secondary control circuits
- IP54 protection rating on all electric hoists and trolleys
- Reverse phase protection relay on all models excluding 250kg
- Optional radio remote control

</table>
Vital is a Japanese brand which is globally recognised for their high quality products. Their range of chain blocks are suited for many applications in the mining, construction, industrial and automotive industry. They have proven to be an economical method to lift heavy loads with ease. The capacities vary from 0.5 tonne to 20 tonne and all chain blocks can be supplied with overload protection for added security of use. All Vital models comply with AS1418.2.

**Electric Wire Rope Hoists**

Electric Wire Rope Hoists are designed for use on building sites and multi-storey units, these compact electric rope hoists are also suitable for a wide variety of applications in warehouses, storage areas, factories, etc.

**Spring Balancers (Retractors)**

Spring Balancers (Retractors) and Zero Gravity Balancers are designed to support heavy hand operated process tools and enables them to be operated with minimum effort. The balancers will automatically retract the tool to its initial position upon releasing it after use. An automatic arresting mechanism (ratchet lock) is available in some models. It allows setting retraction stops to keep the load suspended at predefined positions. The stops are automatically activated if the working load (tool) is moved back slowly. If pushed back fast, the mechanism remains inactive.

**Magnetic Lifters**

Magnetic Lifters can be used in various industries for the lifting and moving of steel, engine parts, semi-manufactured goods and moulds. Due to its magnetic force, there is no need to use slings, clamps or other holding devices. This will eliminate the chance of damaging the lifted materials. Lift capacities up to 6 tonne.

**Girder Trolleys**

Girder Trolleys feature high quality construction for an economical price. They are available in either a push or geared variety and comply with all relevant Australian Standards. Load capacities up to 10 tonne.

**Girder Clamps**

Girder Clamps are used to safely suspend loads of many descriptions from girders (I beams). Manual, Electric and Air hoist installations are examples of their wide capability of usage.

**Electric Chain Hoists**

Hitachi’s reputation for excellence in design, quality, reliability and performance has made this brand a global market leader. With over three decades of proven reliability throughout Australasia and an extensive operating range, Hitachi Electric Chain Hoists are suited to most applications. The Hitachi models vary from 250kg to 15 tonne capacity and are available in three or single phase, two speed or single speed while being tested to the Australian standards.

**Mini Air Hoists**

The Mini Series widens the range of applications in the light duty sector as a handy, flexible and light-weight hoist. The optional Mini Manipulator can be used to lift, lower, traverse and position loads in an easy, manual manner. The carrying capacities vary from 125kg to 980kg, with the 125kg model and the 250kg available with optional travel case.

**JDN Air Hoists**

J.D. Neuhaus manufactures high quality, superior PROFI Air Hoists which are known for their robust designs. This makes their products suitable for tough industrial applications, even in continuous working processes. Safety features, as 100% duty rating and explosion protecting, are an important advantage for applications in hazardous areas. Lift capacities up to 20 tonne.

**JDN Trolleys**

JDN Trolleys are available for both the PROFI and Mining Air Hoists as a manual option (LN) for pushing or pulling by hand. Geared trolleys (LH) are also available for load movement by operating the hand chain mechanism and JDN also offers a motorised trolley (LM) which is powered by an air motor. The carrying capacities go up to 20 tonne.

**Magnetic Lifters**

Magnetic Lifters can be used in various industries for the lifting and moving of steel, engine parts, semi-manufactured goods and moulds. Due to its magnetic force, there is no need to use slings, clamps or other holding devices. This will eliminate the chance of damaging the lifted materials. Lift capacities up to 6 tonne.

MobiCrane Portable Vacuum Lifter

• MobiCrane is designed for mobile and fixed overhead handling of sheet material, sacks, boxes and bespoke products up to 85kg using a range of lifting manipulators including vacuum lifting with standard and bespoke grippers.

• The MobiCrane is constructed in modules with a number of options for installation. The tower can be mounted on the floor, wall, on an existing machine or fixed in a floor plate.

• There are a number of lifting device attachments including mechanical, magnetic or vacuum lifting grippers, suction cups and custom made handling tools.

• This overhead handling application is adaptable to changing requirements and offers flexibility to build the MobiCrane of your choice.

• Max Load: 85kg
• Adjustable Tower: Max lifting height: 2716mm (with tower in highest position) Max lifting height: 1816mm (with tower in lowest position)
• Jib arm length/working area: 2mtrs/11.8m2, 2.5mtrs/18.8m2, 3mtrs/26.6m2, 3.5mtrs/37.7m2, 4mtrs/47.2m2
• Operation: Electric motor lift operation with adjustable lift/ lowering speed Vacuum operated by compressed air.
• Options: Square or round floor plate Mechanical, magnetic or vacuum lifting grippers and bespoke grippers.

The modular design offers maximal flexibility

MobiCrane and MobiArm can be combined with a number of attachments.

The height of the columns is adjustable; slewing arms are available in different lengths.

Mounted on one of the floorplates, the cranes are easy to move around in your premises by using a pallet jack or forklift.

No installation required and easy to move around
Are you considering efficient and effective accessories for handling your products?

Regardless of whether heavy equipment and machine parts have to be moved in your plant every day, or whether you have to transport difficult products such as sacks with the SMI handling system you can be certain to find an economic and proven solution for handling your loads.
Any occupation requiring the repeated lifting, moving or conveying of loads up to 150kg within a specific area will benefit from the implementation of vacuum lifting.

Heavy objects can be moved virtually weightlessly – with only one hand. This virtually eliminates risk of manual handling strain caused by bending, lifting and twisting.

**Principle of Operation**

Grabbing and lifting of loads is achieved by the creation of a vacuum within suction heads and a lifting tube. A vacuum pump is connected to the lifting tube via air hose.

When suction heads are engaged with the object to be lifted, a vacuum occurs attaching the object to the lifter. Lifting of the object is achieved by the single handed control on the control handle. The lifting tube contracts (like an accordion) as the load rises. The load can then be moved easily within the range of the support structure (jib and column or other as required) and lowered and released where required.

The load cannot be released until the load has been lowered and there is no weight on the lift tube. An integrated vacuum reserve allows the load to be lowered to the ground in the case of vacuum loss.

** Loads That Can Be Lifted**

Virtually any load can be lifted using vacuum technology. Suction heads may consist of a single suction cup or multiple suction cups on spreader bar. The positioning may be fixed or variable. Long or wide loads can be lifted using an extended reach control handle. The flexi handle is available for loads that need to be lifted above shoulder height. For specialized requirements, load may be in the vertical plane 90°, 180°, or even 360°.

Polyester Round Slings

- Every sling is proof tested, individually serial numbered, tagged and comes with a test certificate.
- Fabricated using 100% high tenacity polyester yarn and wound in a continuous hank to form an endless sling.
- A durable and specially woven, 100% polyester non-load bearing tubular sleeve to give maximum wear protection to the yarn hank.
- Conforms to AS4497.1.
