LIFTEX

Spring Loaded Rotating Pallet Tables

- The pallet elevator keeps the active layer of the load at or above waist height, eliminating bending and lifting.
- It proves highly effective at reducing the incidences of repetitive strain and back injury.
- The construction of the pallet elevator is a scissor type action with varying springs which can be adjusted for different load capacities up to 2000 kg.
- Turntable allows the operator to rotate the load with minimal stretching and reaching.
- Supplied standard with PVC protection screen
- No ground fixing required

LIFTEX

Low Profile Pallet Lift Table

- Many applications require the regular loading and unloading of palletised goods.
- Repetitive lifting and stretching can be time consuming and hazardous.
- Using pallet lift tables elevates pallets to the optimum lift height reducing the risk of repetitive strain injury and increasing productivity.
- Supplied with entry ramp to allow pallet truck entry
- Can be supplied with optional rotator ring (P1066)
- Tables are specially made for handling pallets, no need for a pit or load ramps
- Upper platform fitted with safety perimeter to prevent descent on contact with obstructions
- 24v control box with UP and DOWN buttons and emergency stop
- External power pack equipped with a relief valve against overloading and a compensating flow valve for controlling lowering speed
- Power Supply: 240v
- Hose burst safety valve to stop the lift table lowering in case of hose breakage
- Removable lifting eyes to facilitate handling and installation of the lift table
- Oil-less bushings on pivot points
- Load Capacity: 2000kg
- Platform Size: 1180x1600mm
- Lifting Range: 105-880mm
- Lifting Time (seconds): 25
- Unit Weight: 419kg
