## Nally Plastic Mega Bins (Vented & Solid)

The Nally MegaBin is the original Australian bulk bin. Designed for fruit and vegetable movement and retail high performance the Nally MegaBin is clearly the way of plastic bins in Australia.

Rounded corners and smoother interior surfaces results in less bruising and damage to your produce. Multiple vents in sides and base provide superior airflow so products cool faster adding valuable shelf life to your produce. The smooth, non-absorbent surface will not harbour or transfer mould, bacteria or disease carrying organisms.

Nally Megabins are up to 40% lighter in weight than wood bins and the weight is constant as they don't absorb moisture. This allows for increased freight efficiencies of 4-5%. In practice you are able to transport 2-3 extra bins of fruit per semi-trailer load.

- Available in both solid and vented
- Standard pallet size (1165mm x 1165mm)
- Fits on standard pallet racking

## Pallet Racking End Protectors

Pallet Racking End Protectors are a highly effective solution for preventing damage to racking and inventory by forklifts.

No matter how good your forklift drivers are, there will always be sometime when an accident or mistake happens when they crash into the pallet racking. You can avoid major injuries and pallet rack damage by installing these protection guards.

Damage and failure not only cause serious safety issues but disassembling, repair, reassembling and reloading of pallet racks add significantly to running costs.
