

Bishamon Pneumatic Rotating Pallet Positioner (EZ Loader X)

- Bishamon automatic work positioners (for same weight pallets) are the modern way to manually load and unload pallets. They work by simply filling the unit with compressed air which has a built in tank for holding the air so it does not require constant air connection.
- They improve efficiency and reduce injury by bringing the level and location of the top of the load closer to the person doing the work.
- Pallet loading and unloading time can be reduced by 40%, thereby substantially increasing productivity
- Self leveling design automatically keeps the top of the load at a convenient working height
- Rotator ring with integral finger guard eliminates reaching and stretching
- Secured ball bearing centre pivot of the 1092mm diameter rotator ring provides smooth, even rotation
- EZ Loaders arrive at your facility fully assembled – just add air!
- Rotator Ring Diameter: 1092mm
- Minimum Self Levelling Capacity: 113kgs
- Maximum Self Levelling Capacity: 1588kgs
