

## Optional Accessories for Scissor Lift Tables

As well as the following optional accessories, MHA has the capability to manufacture custom solutions for your application. Give us a call on 1800 750 900 to discuss!

See this product on page 100 of the MHA catalogue

### Conveyor Bed

Great for use in applications where the goods can be raised then moved onto a bench or production line with ease.

### Protection Curtain

These curtains protect the tables working mechanisms from dust, dirt and debris. The bellows are suitable for indoor and outdoor applications. These curtains can also be made with a chain mesh to give extra protection from objects falling into the working area of the lifter.

### Side Barrier Rails

We can create a railing which can be used as a goods lift for persons or to bridge the gap between levels. We can create a full railing barrier with a swing open door if required. The up/down controls can be mounted at operator waist height so that they can control from lifter platform level.

### Raise and Tilt Platform

The lift table can be fitted with a hydraulic tilt platform with a tilt angle up to 90 degrees. Great for tipping objects into a pit or bin.

### Round Turntable

We can mount a turntable to the top of the lift table which is great for putting pallets or objects on with ease of turning for the operator.

### Forkable Frame

By mounting the lift table on a frame or blocks as shown in red, you can then move the table easily using either a forklift or pallet truck.

#### Trolley – Wheels Mounted

We can fit heavy duty lockable castor wheels to the base frame which would convert your lift table into a mobile unit.

#### Hinged Loading Flap

This can be mounted to the lift table to bridge the gap between loading docks, work areas or vehicles.

#### Side Barrier Rails

We can create a railing which can be used as a goods lift for persons or to bridge the gap between levels. We can create a full railing barrier with a swing open door if required. The up/down controls can be mounted at operator waist height so that they can control from lifter platform level.

#### Side Barrier Rails

We can create a railing which can be used as a goods lift for persons or to bridge the gap between levels. We can create a full railing barrier with a swing open door if required. The up/down controls can be mounted at operator waist height so that they can control from lifter platform level.
