

Electric Expandable Conveyor 610mm (Daisy-Chainable)

The Electric Expandable Conveyor with Sensor Control (610mm) improves efficiency in warehouses, logistics hubs, and distribution centres. These conveyors can flex around corners, service multiple dock doors, and retract to save space. An optional Photo Eye Sensor Kit is available to enhance functionality, acting as an electronic package stop between rollers or at the end of the line.

- The Electric Expandable Conveyor expands from 1500mm to 4350mm.
- The flexible conveyor can bend and twist as needed to manoeuvre around obstacles
- Conveyors can curve up to 90° and 180° curves
- Features Emergency E stop and optional Photo Eye Sensor
 - Optional Photo Eye Sensor Kit can act as an electronic package stop between or at end of rollers
- Maximum 4 x units can be daisy chained connected and joined to make 1 continuous conveyor system
- Easy and quick setup with adjustable height legs from 750mm to 1000mm and 125mm brake castors on every leg
- Ergonomically designed side handles provide a safe grabbing point for operators to open and close conveyors
