

Tyre Inflation Enclosure

The Tyre Inflation Enclosure is built to provide a safe environment for inflating tyres, particularly those used on trucks and heavy machinery. Tyre inflation carries significant risks due to the stored energy in pressurised air or gas, the size and weight of assemblies, and the potential for combustible material.

- Offers personnel protection during tyre inflation
- Helps reduce the risk of injury and damage from a tyre burst
- Compatible with tyres up to 1150mm in diameter and 400mm wide
- Built with heavy-duty construction to resist high force and impact
- Base locating guides keep wheels stable and correctly positioned
- Features five 60mm tube bars with closer spacing in the impact zone for added strength
- Finite Element Analysis verifies the structure can withstand extreme blast forces
- Material: Steel
- Finished in enamel paint for durability

Code	Max. Tyre Size DxW (mm)	Internal Dimensions WxH (mm)	Overall Dimensions LxWxH (mm)	Unit Weight (kg)
