

Drum Rack – 2 Drums

The Drum Rack – 2 Drums provides a safe, compliant, and space-efficient way to store two 205-litre drums in warehouses, workshops, and industrial sites. It's integrated containment area is designed to capture leaks or spills, helping to reduce workplace hazards and avoid environmental contamination.

- Stores up to two standard 205-litre drums securely
- Supplied with a drain plug for easy emptying of the containment area
- Provides a spill capacity of at least 125% of its holding volume, exceeding the Australian Standards for portable units
- Elevated base allows transport by forklift or hand pallet jack
- Rackable design, for efficient warehouse use
- Steel fabricated, non-flammable unit, for safe storage
- Durable Zinc finish provides long-lasting corrosion resistance
