

Carton Sealing Machine

The industrial-grade Carton Sealing Machine is engineered for sealing packages in high-volume operations with consistent performance. The crank handle adjustment for carton width and height is easy to operate without the need for professional technicians. The stainless roller table allows for smooth carton movement. It offers a reliable solution for streamlining package sealing across various box sizes, delivering easy, smooth operation.

- Industrial-grade carton sealing machine engineered for sealing packages
- Features left & right dual side belt drives
- Sealing Speed: 800–1600 cartons/hour
- Tape Size: 48–60mm machine roll
- Height Adjustment: 550–750mm table height
- Power Supply: 220V, 50/60Hz, Single Phase
- Drive Mechanism: Dual side belt drive, 50mm belt width
- Manual adjust dual sides
- Power Rate: 120W Motor, 2pcs
- Carton Size Range:
 - Length: 160mm – unlimited
 - Width: 120–600mm
 - Height: 100–600mm
